# How do I get affiliate sales?

Hello I just started a affiliate program for my website on clickbank. In a week I have about 30 affiliates but I still have no sells. Its an ebook on how to make money. I need help making sales I thought that my affiliates would be able to generate sales but it doesn't look like they are doing a good job, I have offered the highest commission and an incentive's, along with banners and even excerpts from the book. I know the product is a good product because many people can use it. Are there any companies out there that will reach sales goals for me, without me coming out my pocket immediately. PPC is expensive within itself so that's not an option for me. Help me out please.
